

**Job Title:** Software Engineer (Full Stack)

**Location:** Kirkland, WA

**Department:** Product Engineering

Donuts is the global leader in high-quality, top-level domains for unifying, managing and amplifying digital identity. The company is privately held, profitable, and has outstanding backing from Adams Street Partners, Austin Ventures, Emergence Capital and TL Ventures -- top tier venture firms. Donuts is headquartered in Kirkland, Washington, with offices in Denver, Colorado, Dublin, Ireland and Beijing, China. For more information, please visit [www.donuts.domains](http://www.donuts.domains). Donuts recently completed the acquisition of Rightside Group, Ltd.

This is an exciting time to join the Donuts team. The company is thriving and we are gearing up for our next phase of growth.

**The ideal candidate:**

The Product engineering team is responsible for researching and developing new technologies to help drive the adoption of domain names and new user experiences across the internet. Donuts is seeking an experienced full-stack software engineer that can learn advanced concepts such as machine learning, big data processing, and can solve problems using innovative new technologies. You will build the applications that help move the needle for Donuts and allow us to tap into new markets. Join us! This position is full-time and based in our Kirkland, WA office with an opportunity to work remotely some of the time.

**Required Skills:**

- Full stack application development using different modern languages including Python, Go, C#
- Implement unit test coverage and write easily testable code for ease of maintenance
- Implement web interfaces using frameworks such as Vue.js or React
  - Knowledge of HTML 5, CSS, and JavaScript
- Ability to write data driven back-ends using relational & non-relational databases
- Ability to work closely with product management to define functional specifications
- Application development and deployment using cloud platforms such as AWS or Google Cloud
- Comfortable working in an agile team environment, participating in software design, code reviews and business demos

**Minimum Qualifications:**

- 2+ years of programming experience
- 2+ years of experience with SQL and NoSQL data stores
- 2+ years of experience with front-end web technologies: JavaScript, CSS, Typescript, React, Vue.js and Angular

**Preferred Qualifications:**

- B. S. or M. S. Computer Science or related field
- Experience with Python and Go

Donuts offers a highly competitive compensation package and a friendly, collaborative culture that values employee engagement and ongoing career development. Donuts also offers some great perks such as catered Friday lunches, a fully stocked kitchen including coffee, snacks and drinks, as well as great waterfront views.

Donuts is an Equal Opportunity Employer and does not discriminate on the basis of race, color, religion, sex, age, national origin, veteran status, marital status, sexual orientation, gender identity, disability or any other category prohibited by local, state or federal law. This policy applies to all aspects of employment, including recruitment, placement, promotion, transfer, demotion, compensation, benefits, social and recreational activities and termination.
